ABOUT ME

Motivated and detail-oriented MCA student with a strong foundation in computer applications, programming, and software development. Skilled in Python, Java, C++, SQL, and web technologies, with hands-on experience through academic projects such as mobile app development and digital society management systems. Passionate about problem-solving, data-driven solutions, and exploring AI/ML applications. A proactive learner with leadership experience as a Student Council Member, eager to contribute to innovative projects and grow in a dynamic IT environment.

EXPERIENCE

Online digital society management system

Zielotech software pvt ltd | Pune

5th Aug 2024 – 5th April 2025

Client : Zielotech software pvt ltd

- An Online Digital Society Management System is a software platform, often web-based or a mobile application, designed to digitize and automate the operations of a housing society or residential complex.

Key contribution

- Automates bill generation, fee collection, and expense tracking for income and expenditure.
- Facilitates quick and personalized communication through notices, alerts, and messages, often with personalization options.
- Allows residents to log complaints and track their resolution status, while administrators can assign tasks to service personnel.
- Features includes visitor and vehicle tracking, often enhanced by technology like face recognition, to improve security within the complex.

Tools

Html, CSS, PHP, JavaScript, MySql

- Building a digital society platform to streamline operations such as member registration, maintenance tracking, and event scheduling.
